

**The International
Passive House Association**
The global Passive House network

A truly international network uniting both Passive House experts and enthusiasts alike, iPHA works to promote the Passive House Standard and foster a greater public understanding of its significance. iPHA makes a wealth of Passive House knowledge accessible and facilitates active exchange amongst stakeholders while communicating with the media, the general public and the entire range of construction professionals.

The Passive House Standard

A thriving international movement

Passive House stands for healthy, comfortable living and impressive energy efficiency across different climate zones. The Passive House Standard ensures long term energy and financial savings, high levels of comfort and quality and affordable construction.

"Low heating costs and a pleasant indoor climate year round make Passive House the building concept of the future."

Karl Kiggenberg, Law firm in Wassenberg

Over the last two decades, the Passive House Standard has rapidly grown in popularity. Tens of thousands of residential and non-residential units have been built worldwide in an ever increasing range of climates. Certified according to the rigorous Passive House Institute certification criteria, these buildings represent a total floor area of approximately 2,000,000 m².

These numbers are on the rise, driven by the growing number of independent and grassroots organisations forming in countries across the globe, raising awareness of the Passive House Standard.

In order to support this growth, promote the global body of Passive House knowledge and encourage new innovations in energy efficient construction, iPHA brings Passive House stakeholders from around the globe together, to collaborate and advance the Passive House Standard.

Furthering Passive House knowledge

iPHA goals and activities

Raising awareness of Passive House

iPHA promotes the International Passive House Standard, as developed by the Passive House Institute.

Partnering with Passive House organisations worldwide

iPHA affiliates with independent Passive House Associations around the world who uphold high standards in their work and integrate their membership with iPHA.

Connecting the Passive House community

iPHA works with members, including architects, planners, scientists, suppliers, manufacturers, building owners, contractors and property developers to strengthen links within the global Passive House community.

Sharing Passive House expertise

iPHA shares the latest Passive House knowledge, connecting the local to the global and fostering information flow in both directions.

Showcasing projects and user experiences

iPHA documents completed Passive House buildings and encourages users and residents to share their Passive House experience. This helps to increase the uptake of Passive House construction.

Informing on the Passive House market

iPHA serves as the link between the global Passive House community and the Passive House Institute, providing up to date information to Passive House professionals, the wider public, and decision makers.

iPHA membership

Becoming a member has many advantages

Actively & regularly participate in the growing Passive House community by becoming a member of iPHA, the international network for Passive House knowledge.

iPHA membership includes:

- Discounts on Passive House Institute training, software and events such as the International Passive House Conference
- Access to Passipedia, a specialised online resource with a growing body of Passive House knowledge
- Regular newsletters with updates on the latest research, new components and recent Passive House projects.
- Access to the iPHA Forum, an open platform for exchange with other professionals all over the world.
- The option to be included in our online database as a Passive House professional
- Special access to a diverse array of Passive House materials, including regular webinars and presentations by Passive House experts

Whether as an individual or an organisation, membership is a worthwhile investment!
